## Fogelman Management Group Launches Resident Assistance Program

**Memphis, TN April 6<sup>th</sup>, 2009**--Memphis based property management company, Fogelman Management Group, announces the launch of the **Employment Interruption Program**. This program is designed to offer a peace of mind assurance to new as well as renewing residents who may be concerned about losing their job during challenging economic conditions. Fogelman Management group manages more than 19,000 units at 55 apartment communities throughout the Southeast, Midwest and Southwest regions of the country. The company's **Employment Interruption Program** is commensurate with their philosophy to "make life simple®" for their residents. "Today's renter faces a new challenge in our economic environment. The ability to continue to pay bills, including rent, is a huge fear for residents who are nervous about the state of the economy, and our goal is to simply ease this fear" says Mark Fogelman, President of Fogelman Management Group.

Eligibility for the Employment Interruption Program is simple as a current resident must only provide a letter of termination from his and her place of employment or proof of approval for state unemployment benefits. Once this information is received, the lease will terminate within 30 days with no additional fees or negative impact on his or her credit. This program greatly reduces the potential negative financial impact (most of whom have signed long term, 12 months or more, contracts) to the resident who finds themselves involuntarily unemployed. "These economic conditions have presented an opportunity for us to share the Fogelman difference with our residents. We are able to show them we care about our residents and offer them peace of mind when they make their decision to live at a Fogelman community" says Fogelman.
