Grilling Tip of The Month

There is nothing better than outdoor grilling. It's one of the most popular ways to cook food. But, a grill placed too close to anything that can burn is a fire hazard. They can be very hot, causing burn injuries. Follow these simple tips & you will be on the way to safe grilling.

When using a charcoal grill, purchase the proper fluid and store out of reach of children and away from heat sources. Never add charcoal starter fluid when coals or kindling have already been ignited, and never use any flammable or combustible liquid other than charcoal starter fluid to get the fire going.

Before grilling over charcoal, allow the coals to form a thin white ash appearance. Grate should be positioned 3-5" above coals
